## BOTOX INJECTION INFORMED CONSENT

Patient: \_\_\_\_\_

Age: \_\_\_\_\_

**To the Patient :** You have the right to be informed about your skin condition and treatment so that you may make the decision whether or not to undergo the procedure after knowing of the risks and hazards involved. This disclosure is not meant to scare or alarm you. It is simply an effort to better inform you so that you may give or withhold your consent for the treatment program.

I have requested that \_\_\_\_\_ attempt to improve my facial expression lines with Botox. This is the trademark for Botulinum toxin. These injections have been used for more than a decade in children and adults to improve the problem of muscle spasm of facial muscles. This toxin has also been useful to correct double vision due to muscle imbalance. Injection of minor amounts, weaken the muscle and prevent frowning of crow's feet and expression lines. Although the results are usually dramatic, I have been informed that the practice of medicine is not an exact science and that no guarantees can be or have been made concerning expected results in my case.

**Initial if you understand and agree** \_\_\_\_\_

Improvement in injected areas will occur within **ONE WEEK**. If the results are not satisfactory after one week, please call to schedule an appointment for re-injection. There is a \$100.00 charge for re-injection to cover the cost of Botox. Any longer than six weeks between injections and your Botox injection will be charged the normal fee.

**Initial if you understand and agree** \_\_\_\_\_

The solution is injected with a small needle into the muscle. You will see the benefits develop in the next three to seven days. Please note that Botox is used to reduce lines caused by muscle contraction. Lines that are visible when your muscles are relaxed may be *softened* by the Botox treatment but will still be visible. Continued treatments will assist in softening those areas further.

**Initial if you understand and agree** \_\_\_\_\_

Side effects and complications have been minimal. Occasionally, slight swelling and/or bruising may last for several days after the injections. Rarely, an adjacent muscle may be weakened for several weeks after an injection. I have been advised of the risks involved in such treatment, the expected benefits of such treatment and alternative treatments, including no treatment at all.

**Initial if you understand and agree** \_\_\_\_\_

I agree that this constitutes full disclosure and that it supercedes any previous verbal or written disclosure. I certify that I have read and fully understand the above paragraphs and that I have had sufficient opportunity for discussion and to ask questions.

**Initial if you understand and agree** \_\_\_\_\_

### First Procedure

\_\_\_\_\_  
**Staff Signature**

\_\_\_\_\_  
**Patient Signature and Date**

### Second Procedure

\_\_\_\_\_  
**Staff Signature**
